## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 25-28 and 49-52 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 25 and 26 recite the limitation "*said shaped body comprising a three-dimensional structure including pores defined between said particles.*" It does not appear that the specification as originally filed provides support for such limitations and applicant has not detailed where in the specification such support may be found.

If applicant believes that the specification does provide support for the recitation considered by the examiner to constitute new matter, applicant is requested to point to the page and line number where such support can be found.

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 25-28 and 49-52 have been considered but are not persuasive.

Applicant argues that while the instant specification does not specifically contain the words "including pores defined between said particles" the disclosure indicates such to a person of ordinary skill in the art. This argument has been considered but is not persuasive. The passages cited by applicant appear to refer only to the zeolite itself, which is a porous body. There does not appear to be any support for the language "including pores defined between said particles" and it is not clear that applicant had possession of that invention at the time of filing.

### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
